

# ROCK SALT

## Product FAQ's

**Q:** *Does the product have an odor?*

**A:** Yes, upon initial application due to its organic material "sugar beets". The odor will subside after a short period of time.

**Q:** *What Colour is it?*

**A:** ROCK SALT Powered By FUSION's natural colour is dark brown, therefore it will apply similar.

**Q:** *Will the product stain?*

**A:** No, the product is completely water soluble (washes off with water) and will not leave any visible signs.

**Q:** *What is the application rate?*

**A:** Use approximately 20-40% LESS than your plain rock salt application.

**Q:** *What temperature can I use this product down to?*

**A:** ROCK SALT Powered By FUSION can work down to -30 C unlike plain rock salt that stops working around - 15 C.

**Q:** *Will this product freeze in my hopper?*

**A:** Great question! As long as you have a cover for your hopper unit and no precipitation can dilute the product inside the hopper, it will never freeze or clump up. You can keep it in there for weeks!

**Q:** *If some of the product gets on my grass will it kill it?*

**A:** Yes, especially if you over apply. If used as directed with lower applications rate you will find less damage to turf.

**Q:** *If this product safe for pets?*

**A:** Yes, it is safe for use around pets as long as you use as directed and reduce the application rate.

**Q:** *Who much snow will this product melt?*

**A:** You will melt as much snow as plain rock salt using 20-40% LESS.
